

Massachusetts Department of Environmental Protection *MassCleanDiesel: Clean Markets Program*

WORKSHOPS

What will the workshops cover?

MassDEP's workshops will provide owners of diesel trucks and transportation refrigeration units (TRUs) delivering to or operating at wholesale markets, warehouses, and distribution centers with information on: 1) the environmental and cost benefits of the *MassCleanDiesel: Clean Markets Program*; 2) engine eligibility and program requirements for obtaining grants; and, 3) emission reduction technologies offered in the program. Attendees will also be able to meet with the state-contracted vendors of the emission control technologies at the end of the presentation. All four workshops will be identical in content.

Who should attend the workshops?

These workshops are designed for owners of diesel short and long-haul trucks and TRUs servicing or operating at wholesale markets, warehouses, and distribution centers in Massachusetts.

When and where will the workshops take place?

Four workshops will take place in September, and each workshop is expected to last approximately 90 minutes. The program's benefits, financing structure, and technologies will be discussed in the first hour of the workshop; the remainder of the workshop will be free time where engine owners can meet with the technology vendors. MassDEP has scheduled workshops in Boston, Lakeville, Sturbridge and Worcester on the dates listed below. Directions are on the back of this announcement.

Do I have to register to attend a workshop?

Yes. Because there are a limited number of seats at each workshop, MassDEP would like attendees to register for each workshop. Please contact Susan Lyon at 617-556-1101 or susan.lyon@state.ma.us to register.
